Grad™ for KeboNy

Grad™ Mini Rail

The Grad™ Mini Rail is designed to precisely and permanently lock the Kebony Grad™ Cladding in place quickly and easily. The rail clips come placed in the exact position so all you have to do is fasten the rails onto the sheathing or vapor barrier then snap the boards on. The rails create a natural air gap so there's no need to install furring strips ahead of time.

Based on the desired aesthetic, Mini Rails come in two different gap sizes and can be installed vertically or horizontally.

HIGHLIGHTS

- Patented clips pre-mounted on aluminum rails
- Uniform spacing for the perfect look
- Built-in air gap behind the boards
- A true hidden fastening system
- 50% faster installation time
- Made of 100% recyclable aluminum & POM (polyoxymethylene)
- No pre-drilling of the boards or rails required

1x6 w/Narrow Gap

Product Number: G2171

Rail Length: Approximately 6 ft.

Coverage: 200 sf/box (Based on 24" on center spacing)

$\frac{5}{32}$ "

The narrow gap gives a similar appearance to a nickel gap profile.

1x6 w/Wide Gap

Product Number: G2172

Rail Length: Approximately 6 ft.

Coverage: 200 sf/box (Based on 24" on center spacing)

$\frac{17}{64}$ "

The wide gap gives a similar appearance to a shiplap profile.

Accessories

Grad™ Spacing Template

Included in your Mini Rail box will be a spacing template. This tool is placed between an existing rail and the next rail to keep alignment and gap spacing uniform across the project.

Grad™ Riser Support

For roof lines or short runs, you can use the riser support to maintain the correct gap between the stud and the board. The riser support has an opening so you can face fasten the board using the Pro Plug® system for Kebony.

Kebony Grad™ Cladding

One Board Designed for Multiple Aesthetics

Tired of trying to choose the perfect profile for your project? Should you use a shiplap profile or a tongue and groove, and what's the difference? In the end, we are all trying to achieve a certain look for our project without fasteners and endless profile options getting in the way. Our Clear Grad™ Cladding was designed to give you the look you want without the worry of choosing between custom profiles. The grooves on the back of the board fit seamlessly with the Grad™ system, giving you the option of installing

the board vertically or horizontally with 2 different gap sizes to choose from.

- 30 year warranty
*see warranty info on www.kebony.us
- 50-75 year expected life span
- No maintenance required
- Fades to silver-gray patina when left unfinished
- In stock, no custom milling required
- One board with 2 gap size options

Profile	Product Number	Product Name	Actual Dimensions	Lengths
	#2682	1x6 Clear Grad™ Cladding	1 3/16" x 5 1/16"	10', 12', 14', 16'

Appearance

All Kebony woods have a deep brown color that will turn to a silver-gray patina over time.

The speed of this graying process depends on the intensity of exposure to environmental elements like the sun and rain combined with the type of application.
